

PUSH BUTTON TANK GAUGES

Push Button Gauges give a clear reading of the level of the contents of a tank. They have unbreakable sight tubes and can be supplied in lengths to suit any tank.

The unit is fitted with a self closing valve designed to comply with BS799 and has been accepted by major oil companies.

| | |
|--------------------|--|
| Specification: | Protection against insects and dust. |

| 10ft | PBG 3/4 BSPUNION |

1/2" OR 3/4" BLANKING PLUG

Other connection sizes and lengths are available.

½" valve only mechanism £23.96

Note that the gauge has an open union connection.

The open union connection facilitates the installation of a shut off valve, allowing filling or draining of the tank.

If it is not intended to fit a shut off valve, then we can supply a blanking plug to seal the connection.
