

Style P Sight Glass

This straight through sight glass is ideal for you to visually check the presence, colour and condition of a liquid.

- ◆ Screwed and flanged connections
- ◆ High quality robust design
- ◆ CE marked and fully PED compliant
- ◆ High temperature and pressure ratings
- ◆ Short lead times
- ◆ Designed and manufactured in the UK.

Application

The style P sight glass has a plain spout cast in the body and is used to check for the presence of a liquid where there is intermittent flow, partially filled lines or entrained air. It can be used in vertical or horizontal lines. The integral drip lip makes it ideal for leak detection.

Construction

The standard bodies are cast in either; carbon steel, 316 stainless steel or LG2 gun metal, though we can produce them in other materials

The glass windows are held in place by stainless steel covers and screws, and sealed with PTFE gaskets, giving superior protection. For ease of maintenance the glasses can be individually removed and replaced.

For standard applications the indicator is fitted with toughened soda lime glass discs to BS3463 and rated to 16 bar. For steam and condensate we recommend toughened borosilicate glass, while for alkaline liquids mica discs can be used to protect the glass.

The sight glasses can be supplied with screwed connections to NPT, BSP parallel or taper. The standard flanges available are ANSI 150, ANSI 300 and PN16, though special flanges can be supplied.

Options

Body - Primary Flowpoints stock carbon, stainless steel and gun metal, but can supply sight glasses in special materials such as super duplex, hastelloy or low carbon steels. For particularly corrosive applications the body can be lined with PFA.

Glass - High pressure toughened soda lime to BS3463 rated to 40 bar or 60 bar depending on the size, toughened borosilicate to BS3463 or DIN7080 rated up to 16 bar. Higher pressures are achievable by reducing the viewing diameter. The high pressure range uses powder coated mild steel covers as standard, though stainless steel covers are available.

Gaskets - Graphite gaskets are available if required.

Fasteners - We can also offer A4 stainless steel fasteners when necessary.

Quality

All Flowpoints indicators are manufactured to the highest standards.

The quality system is independently audited by BSI and certified to ISO 9001. The indicators are fully PED compliant and CE marked where required. TUV are our external auditors for the Pressure Equipment Directive.

Full material traceability is maintained, material certificates and pressure test certificates are supplied on request.

Specification Code

Code			Description
SP			Stainless steel body BS 1504 316 C16
CP			Carbon steel body BS 1504 161 GR480
GP			Gunmetal body BS 1400 LG2 (screwed only)
			Glass Material & Pressure Range
H			Toughened soda lime glass to BS3463 rated to 16 bar (Standard)
B			Toughened soda lime glass to BS3463 rated to 40 bar
HB			Toughened borosilicate glass to BS3463 rated to 6 bar
			Toughened borosilicate glass to DIN 7080 rated to 16 bar
			Indicator Size
	008		8mm / 1/4" (screwed only)
	010		10mm / 3/8" (screwed only)
	015		15mm / 1/2"
	020		20mm / 3/4"
	025		25mm / 1"
	040		40mm / 1 1/2"
	050		50mm / 2"
	080		80mm / 3"
	100		100mm / 4"
	150		150mm / 6"
	200		200mm / 8"
	250		250mm / 10"
			End Connection
	A		ANSI 150
	C		ANSI 300
	N		PN16
	1		BSP
	2		BSPT
	3		NPT
	4		Socket Weld

Materials of Construction

- Covers - Stainless steel ASTM A351 CF8M (316)
- Powder coated mild steel grade S355J2+N
- Internal Gasket - PTFE (stainless steel and carbon steel)
- Klingersil C4400 (gun metal)
- External Gasket - Klingersil C4400
- Edge Protector - Klingersil C4400
- Fasteners (Standard) - A2 Stainless steel
- (High Pressure) - High tensile steel
